

GIS Maps & Service Request Price Schedule

Public requests for GIS maps and services have increased in proportion with the increased popularity of the City's GIS. This has in turn affected our costs and time spent on public requests. To help offset some of the costs, the GIS Section has devised a price schedule for map products and services requested by the public. The Section will make available our most frequently requested maps in the sizes of 17"x11" and 24"x36". The Section will levy a per copy charge of \$10.00 for 17"x11" standard maps and \$20.00 for 24"x36" standard maps. The current list of standard maps is as follows:

1. Citywide Commission Districts
2. Single Commission Districts
3. Citywide Home Owners Associations
4. Home Owners Associations in a single Commission District
5. Citywide Voting Precincts
6. Voting Precincts for a Single Commission District

More maps may be added to the list of standard maps as demand for those maps increase.

In cases where the public requests a map or service that is not a standard map, the GIS Section will estimate the amount of time required to complete the request. The Section will recoup the cost of computer time for completing the request at \$45.00 per hour. A minimum of \$45.00 will be charged for custom maps and services.
